

Discovering Mathematical Objects of Interest—A Study of Mathematical Notations

¹ University of Wuppertal, Germany (andre.greiner-petter@zbmath.org, {last}@uni-wuppertal.de)

³ University of Konstanz, Germany ({first.last}@uni-konstanz.de)

ABSTRACT

KEYWORDS

datasets, neural networks, gaze detection, text tagging

1 INTRODUCTION

[1]

2 METHOD

3 EVALUATION

4 CONCLUSION & FUTURE WORK

ACKNOWLEDGMENTS

We thank the Wikimedia Foundation, particularly Marko Obrovac, for their continuous support. Our research was supported by the German Research Foundation (DFG grant no.: GI 1259/1).
